

***New* Porcelain Insulators up to 132kV**

Design Features

W T Henley offer porcelain insulators for LV and MV applications up to 132kV. The products, ranging from reel, coach screw, along with stay type 1 and 2 through to pin, post, cap and pin disc type.

Each Insulator is manufactured and tested to international and national standards and can be supplied in brown or munsell grey.

All of our insulators are supplied as standard, with a ref no 16 zinc thimble and are normally supplied with a semi conducting glaze.

- Fully compliant with BS EN 60383-1
- Manufactured using a high grade brown glaze.
- Pin insulators heads have a semi conducting glaze which aids radio noise reduction.
- Ball and Socket couplings in accordance with BS 3288-3 and BS EN 60120.
- Tongue and Clevis fittings available if required.
