

***New* Single Pole/Double Pole Street Lighting Cutout for single phase supplies**

Design Features

We are pleased to unveil the latest innovation from W T Henley.

Designed to fit the smallest lamp-posts and with versatility and ease of use in mind, this new robust (yet light-weight) Street Lighting Cutout is moulded from a high grade thermoplastic. The hood is designed to be entirely drip proof. The generously sized area at the base allows for simplified terminating.

Terminals are all manufactured from electroplated brass.

Our zero force lever release system makes both the carrier removal and/or fuse-link inspection simple, as well as ensuring complete disconnection from the live supply.

Padlocking facility as standard for safe 'dead' working.

Standard terminals accept 25mm² conductors.

Product Code	Description
54715-18	SNE Single Pole
54715-22	CNE Double Pole
54715-12	CNE Single Pole
54718-15	Armour Bond kit
54718-20	Loop in connector
54718-25	Terminal Shroud

- Compliant with BS 7654: 1997.
- Zero Force Lever Release System
- Single Phase CNE or SNE
- Single Pole /Double Pole Isolation.
- Slim-line design which fits the smallest Lamppost.
- Padlocking facility
- Will accept 25mm² Conductors.
- Manufactured from robust thermoplastic with excellent tracking and impact resistance.
- Accepts Tag type fuse-links to BS 88 Pt1.
- Optional Shrink-back Restrictive Clip can fitted to each unit
- Suitable for armoured cable when used in conjunction with the armour bonding clamp kit.
- Loop in/out kit for 3 phase cables (supplied separately)
